Victorian Hearing conducts earwax removal to the industry gold standard by university trained Audiologists who are dedicated experts of the ear canal and hearing health.

## A 30 minute wax removal appointment will include:

- « Visualisation of the ear canal and earwax by either medical microscope or head-mounted magnifier
- « Earwax softening drops if required
- « Removal of earwax via clinically appropriate techniques: including micro-suction (gentle vacuum), curettage (specially designed spoons) or low-pressure water spray
- « Post-removal check of the ear canal, ear drum and a medical opinion on ear health.
