

AUDIOLOGY TABLE OF SERVICES

Adult & Paediatric

Victorian Hearing is a locally owned and run private practice. We are proud to be an independent Audiology clinic offering a full range of audiological services.

When Victorian Hearing opened in 2006 our priority was, and still is, to provide professional, ethical hearing health care with exceptional customer service. This includes no staff being on any commissions or sales targets. This allows us to remain patient focused.

Victorian Hearing proudly holds a strong and trusted reputation within the medical field, providing many local ENT surgeons with diagnostic audiology. We provide hearing health education to GPs, nurses, allied health professionals and the local community.
